

## FOCUS

## Make Disaster Kits

## **Create Disaster Supplies Kits**

Everyone should have personal disaster supplies kits. Keep one kit in your **home**, another in your **car**, and a third kit at **work** or **school**. This is so they can be reached even if your building is badly damaged. Backpacks or other small bags are best for your disaster supplies kits so you can take them with you if you evacuate. The kits will be useful for many emergencies. Include at least the items that are listed on side two of this Focus Sheet.

Electrical, water, transportation, communications, and other vital systems can be disrupted for several days after a large earthquake or other disasters. Emergency response agencies and hospitals could be overwhelmed and unable to provide you with immediate assistance. Knowing first aid and having supplies will save lives, will make life more comfortable, and will help you cope after the next disaster. In addition to your personal disaster supplies kits, store a household disaster supplies kit in an easily accessible location (in a large watertight container with wheels that can be easily moved), with a **three-day to 10 days** of the items listed on side two of this Focus Sheet.
