# FOCUS

### **Landslides and Mudslides**

#### The ground can move without a quake!

When most people think about ground movement, they probably envision images of the ground below them moving from side to side, or up and down, during an earthquake.

It is important that residents who live on steep hillsides and in canyons be prepared for landslides. Areas that don't have grass, trees, shrubs and plants, such as after a fire, are more likely to have landslides. This includes sliding, falling and flowing soil, rock, mud, brush and trees, especially during or after heavy rains.

Slow-moving landslides can cause significant property damage, but they usually don't cause injury or death. Mudslides, however, are much more dangerous. According to the California Geological Survey, mudslides can easily exceed speeds of 10 miles per hour and often flow at rates of more than 20 mph. Because mudslides travel much faster than landslides, they can cause deaths, injuries and significant property damage.

Wherever you live, work, or play, take the actions on the reverse side of this Focus Sheet to help reduce your risk of death, injury and property losses from landslides, mudslides and other types of ground failure.

#### When It Rains

Ш	Monitor the amount of rain during intense storms. More	
	than three to four inches of rain per day, or 1/2-inch per	
	hour, have been known to trigger mudslides.	
П	ook for geological changes near your home:	
	□ New springs	
	☐ Cracked snow, ice, soil or rocks	
	☐ Bulging slopes	
	<ul> <li>□ New holes or bare spots on hillsides</li> </ul>	
	☐ Tilted trees	
	☐ Muddy waters	
Ш	Listen to the radio or watch television for information and	
_	instructions from local officials.	
	Implement protection measures when necessary:	
	☐ Anticipate runoff and place sandbags in areas as	
	needed	
	☐ Board up windows and doors	
	Prepare to evacuate if requested to do so.	
	Respect the power of the potential mudslide. Remember,	
	mudslides move quickly and can cause damage and kill.	
П	Prioritize protection measures:	
	☐ Make your health and safety and that of family	
	members the number one priority.	
	☐ Make your home the number two priority.	
	make your nome the number two phonty.

This information sheet is produced as part of the Emergency Survival Program (ESP). ESP is an awareness campaign designed to increase home, neighborhood, business and school emergency preparedness. ESP was developed by the County of Los Angeles. The California Emergency Management Agency (Cal EMA) and representatives from Contra Costa, Imperial, Inyo, Kern, Los Angeles, Marin, Mono, Orange, Riverside, San Bernardino, San Diego, San Luis Obispo, Santa Barbara, Santa Cruz, and Ventura counties, Southern California Edison, the Southern California Earthquake Center and the American Red Cross assist in the development of campaign materials and coordination of the campaign.
